

FMATS 2010-2013
TRANSPORTATION IMPROVEMENT PROGRAM (TIP) &
AIR QUALITY CONFORMITY DETERMINATION

The 2010-2013 TIP represents a consensus among local, state and regional officials as to which tangible and funded transportation improvements to implement in the next four years. This marks the last stage of the plans development; project nominations have been reviewed and a draft air quality conformity determination has been completed. This form can be used to submit comments or via email. Copies of the 2010-2013 TIP and the related Air Quality Conformity Determination are available for public review at the FMATS Office and on the website.

COMMENTS:

HOW ABOUT ~~3~~ TIMING THE TRAFFIC CONTROL LIGHTS
ON AIRPORT RD SO THAT TRAFFIC CAN FLOW
THROUGH WITH OUT HAVING TO STOP SO
OFTEN AND POST/SIGNAGE THAT
SPEED TO WHAT THAT TIMING IS.

TRAFFIC CONTROL LIGHTS ARE NOT
ALWAYS NEEDED. EXAMPLE BY
THE AIRPORT - MAYBE JUST A
CENTER TURN LANE MIGHT HELP.
